

Report Number: 10

SEN: Profound & Multiple Learning Difficulty

EHCP REPORT #10

Section A: Views, interests, and aspirations

[Name] is a happy 4-year-old boy who responds positively to sensory stimulation, particularly tactile play and rhythmic music. His parents aspire for him to develop a reliable method of communication to express his needs and preferences. They want him to be as independent as possible in his self-care and to be fully included in the social life of his school community.

Section B: Special educational needs

[Name] has Profound and Multiple Learning Difficulties (PMLD). He requires high levels of support for all aspects of learning and daily living. He has a secondary need of Visual Impairment (VI), which significantly impacts his ability to access the curriculum and navigate his environment. He requires a multi-sensory approach to learning and specialized equipment to support his visual processing.

Section C: Health needs

[Name] requires support with complex physical needs, including postural management and positioning to prevent contractures. He requires regular monitoring of his visual health by a specialist team. He requires support with feeding and hydration, and staff must be trained in his specific manual handling and medical protocols.

Section D: Social care needs

[Name] requires support to access community activities and short breaks to support family wellbeing. He requires an environment that is adapted to his physical and sensory needs to ensure his safety and inclusion.

Section E: Outcomes sought

1. Communication: [Name] will use a consistent, intentional method (e.g., switches, objects of reference, or gesture) to make choices.
2. Sensory/VI: [Name] will demonstrate increased visual tracking and engagement with high-contrast, tactile resources.
3. Physical: [Name] will tolerate and engage with a range of postural positions throughout the school day to support physical development.
4. Independence: [Name] will participate in self-care routines (e.g., washing hands, feeding) with decreasing levels of physical prompting.

Section F: Special educational provision

- A highly structured, multi-sensory curriculum delivered in a small group setting.
- Daily access to a Qualified Teacher of Children and Young People with Vision Impairment (QTVI) for curriculum adaptation.
- Use of high-contrast, tactile, and auditory resources to support visual impairment.
- Speech and Language Therapy (SALT) input to develop a total communication approach.
- Regular physiotherapy and occupational therapy programs integrated into the daily classroom routine.
- 1:1 support from a teaching assistant trained in PMLD and VI strategies.

Section G: Health provision

- Annual review of postural management plan by a physiotherapist.
- Regular monitoring by the VI nursing team.
- Staff training on medical protocols and safe manual handling.
- Access to school nursing services for health monitoring.

Section H1: Social care provision (CSDPA 1970)

- Provision of specialist equipment to support daily living and safety at home.
- Access to short breaks to support the family unit.

Section H2: Additional social care provision

- Support from a social worker to coordinate multi-agency care and transition planning.

Section I: Placement

[Name] will attend a state-funded special school that specializes in PMLD and sensory impairment, providing a low-arousal, highly adapted environment.

Section J: Personal budget / direct payments

A personal budget is not currently requested; the local authority will provide the necessary provision directly through the school placement.

Section K: Assessment evidence and advice

- Educational Psychologist Report (dated [Date])
- Speech and Language Therapy Assessment
- Physiotherapy/Occupational Therapy Assessment
- QTVI Specialist Report
- Parental and Medical Consultation Records
