

Report Number: 291

SEN: Multi-sensory impairment

EHCP REPORT #291

Section A: Views, interests, and aspirations

[Student Name] is a bright, curious four-year-old who enjoys tactile play, particularly sensory bins with textured materials and rhythmic music. Her parents aspire for her to develop a reliable method of communication to express her needs and to build the confidence to navigate her school environment safely. [Student Name] enjoys being near her peers and responds positively to one-to-one attention from familiar adults.

Section B: Special educational needs

- 1. Multi-sensory Impairment (MSI):** [Student Name] has a combined vision and hearing impairment that significantly impacts her ability to access the curriculum and environment. She requires specialized strategies to interpret sensory information.
- 2. Social, Emotional, and Mental Health (SEMH):** Due to the challenges of navigating a world with limited sensory input, [Student Name] experiences high levels of anxiety, which manifests as withdrawal or dysregulation when she feels overwhelmed by her environment.

Section C: Health needs

[Student Name] requires ongoing monitoring by a Qualified Teacher of Children and Young People with Multi-Sensory Impairment (QTMSI). She requires regular audiological and ophthalmological reviews to ensure her sensory aids are functioning optimally.

Section D: Social care needs

[Student Name] requires support to develop social interaction skills and to ensure her safety in the community. Her family requires support in navigating sensory-friendly environments and respite to manage the demands of her complex care needs.

Section E: Outcomes sought

- 1. Communication:** [Student Name] will use a consistent, personalized communication system (e.g., tactile symbols or objects of reference) to express basic needs and preferences.
- 2. Regulation:** [Student Name] will demonstrate increased tolerance to sensory input, reducing instances of dysregulation by 50% over the next 12 months.
- 3. Independence:** [Student Name] will navigate familiar areas of the school environment with the support of a sighted guide or tactile cues.

Section F: Special educational provision

- Daily 1:1 support from a Learning Support Assistant (LSA) trained in MSI strategies.
- Weekly sessions with a QTMSI to adapt curriculum materials and environment.
- Implementation of a "low-arousal" approach to manage SEMH needs.
- Provision of a sensory-rich, predictable environment with clear tactile boundaries.
- Use of intensive interaction techniques to build communication foundations.

Section G: Health provision

- Annual review of sensory equipment (hearing aids/glasses).
- Access to a Speech and Language Therapist (SALT) with experience in MSI to develop a communication passport.

Section H1: Social care provision (CSDPA 1970)

- Provision of specialist equipment to support sensory development at home.
- Access to short-break services to support family wellbeing.

Section H2: Additional social care provision

- Referral to local disability support groups for peer networking and family guidance.

Section I: Placement

[Student Name] will attend a mainstream state-funded primary school with a designated resource base for sensory impairment, ensuring access to both inclusive peer opportunities and specialist intervention.

Section J: Personal budget / direct payments

A personal budget is allocated to cover the cost of specialist sensory equipment and additional training for staff beyond the core offer.

Section K: Assessment evidence and advice

- Educational Psychologist Report (dated [Current Date]).
- QTMSI Assessment and Sensory Audit.
- Speech and Language Therapy Assessment.
- Parental and Early Years Practitioner observations.
