SEN: Missing

EHCP REPORT #313

Section A: Views, interests, and aspirations

The child is a 6-year-old male who enjoys building with construction blocks and playing with sensory water toys. He is described by his family as a curious child who loves animals, particularly dinosaurs. His parents aspire for him to develop the communication skills necessary to express his needs independently and to build meaningful friendships with his peers in a supportive primary school environment.

Section B: Special educational needs

The child has identified needs in the area of Communication and Interaction, specifically relating to Autistic Spectrum Disorder (ASD). He experiences significant challenges with social communication, understanding non-verbal cues, and managing transitions between activities. He requires high levels of adult support to remain regulated and engaged in classroom learning.

Section C: Health needs

The child has no specific medical diagnoses requiring clinical intervention. However, he presents with sensory processing differences, specifically a high need for proprioceptive input to maintain focus during seated tasks.

Section D: Social care needs

The child requires support to develop age-appropriate social interaction skills. There is a need for consistent routines and visual supports to reduce anxiety in social settings and during unstructured times, such as lunch and break periods.

Section E: Outcomes sought

1. By the end of Key Stage 1, the child will use a visual communication system or verbal prompts to initiate requests for assistance or needs.
2. The child will participate in a structured small-group activity for 15 minutes with minimal adult intervention.
3. The child will successfully transition between three daily activities using a visual schedule with no more than one verbal prompt.

Section F: Special educational provision

- Access to a structured, low-arousal learning environment.
- Daily use of a visual timetable and "now/next" boards.
- Access to a sensory break area within the classroom.
- Small group interventions focusing on social communication and turn-taking, led by a trained teaching assistant.
- Speech and Language Therapy (SALT) input to develop functional communication strategies.

Section G: Health provision

- Occupational Therapy (OT) consultation to provide a sensory diet plan to be implemented by school staff.
- Annual review of sensory needs to ensure the environment remains appropriate for the child's development.

Section H1: Social care provision (CSDPA 1970)

- Provision of information and advice to parents regarding local support groups and short-break services to facilitate the child's social development outside of school hours.

Section H2: Additional social care provision

- None identified at this time.

Section I: Placement

State-funded primary school with a mainstream classroom setting and access to a dedicated SEN resource base for targeted interventions.

Section J: Personal budget / direct payments

A personal budget is not requested at this time as the provision can be met through the school's delegated funding and local authority core services.

Section K: Assessment evidence and advice

- Educational Psychologist Report (dated [Current Date]).
- Speech and Language Therapy Assessment.
- Parental and Teacher observations.
- Early Years Foundation Stage (EYFS) profile data.
