

Report Number: 407

SEN: Autistic Spectrum Disorder

EHCP REPORT #407

Section A: Views, interests, and aspirations

The child is a curious and sensory-seeking toddler who enjoys cause-and-effect toys, particularly those involving lights and repetitive sounds. Her parents describe her as a happy child who thrives in predictable environments. Their aspiration is for her to develop functional communication skills to express her basic needs and to successfully transition into a mainstream nursery setting with appropriate support to build social confidence.

Section B: Special educational needs

1. **Autism Spectrum Disorder (ASD):** The child experiences challenges with social communication, social interaction, and restricted/repetitive patterns of behavior. She requires support to regulate her sensory responses and engage in joint attention.
2. **Speech, Language, and Communication Needs (SLCN):** The child has significant delays in expressive and receptive language. She is currently pre-verbal and requires support to develop early communication strategies, such as PECS or Makaton.

Section C: Health needs

The child has no identified medical needs beyond those associated with her neurodevelopmental profile. She requires a sensory-friendly environment to manage potential over-stimulation.

Section D: Social care needs

The child requires support to access community activities and nursery provision. Her family requires support in navigating early years strategies to manage sensory regulation and communication at home.

Section E: Outcomes sought

1. **Communication:** The child will use at least 5–10 functional signs or symbols to express her needs (e.g., "more," "stop," "help") within 12 months.
2. **Social Interaction:** The child will engage in parallel play alongside peers for 5–10 minutes with adult facilitation.
3. **Sensory Regulation:** The child will demonstrate increased tolerance to transitions between activities with the use of visual schedules.

Section F: Special educational provision

1. **Communication Support:** Daily implementation of a structured communication system (e.g., PECS or Makaton) led by a Speech and Language Therapist (SLT) and reinforced by nursery staff.
2. **Staffing:** 1:1 adult support during key transition times and group activities to facilitate social engagement.
3. **Environment:** A low-arousal, predictable nursery environment with a designated "calm-down" space.
4. **Staff Training:** Nursery staff to receive training on ASD-friendly communication strategies and sensory processing.

Section G: Health provision

Access to an SLT for consultation and the development of a communication plan, reviewed termly.

Section H1: Social care provision (CSDPA 1970)

Provision of a sensory equipment kit for home use to support regulation, as recommended by an Occupational Therapist.

Section H2: Additional social care provision

Access to local authority-funded short breaks or parent-carer support groups to assist with the management of the child's sensory and communication needs.

Section I: Placement

[Name of Local State-Funded Nursery], with an integrated support package.

Section J: Personal budget / direct payments

A personal budget is not requested at this time; provision is to be delivered via the nursery's core funding and top-up funding provided by the Local Authority.

Section K: Assessment evidence and advice

- Educational Psychologist Report (dated [Current Date])
- Speech and Language Therapy Assessment (dated [Current Date])
- Early Years Foundation Stage (EYFS) Progress Summary
- Parental and Nursery Staff Questionnaires
